

PROJECT
VICKY

Ultimate Floatinglife expression of a timeless elegance yacht,
where perfectly balanced lines meet unparalleled
long-range capabilities. embark on a journey of discovery,
with luxury and style as your constant companions.

PROJECT VICKY

THE INTELLIGENT WAY OF ENJOYING A SUPERYACHT

The Project Vicky is a yacht developed by a team of seasoned experts with over 40 years of shipyard and yacht management experience. The technical base of this 40-meter yacht is a steel hull designed for long distances and tested in the Rome tank to verify its performance. It combines durability and performance, ensuring an unparalleled seafaring experience that meets the highest standards of luxury and reliability.

KEY FEATURES

SENSE OF FREEDOM

- Direct access from the aft area to the guest zone
- Multifunctional beach area
- Two pools for ultimate relaxation
- Sea-facing gym for an immersive workout experience
- Restaurant kitchen
- Ample storage for world-cruising capabilities
- Available with the latest Volvo Penta system or a traditional propulsion shaft line
- Bottom walk – in technical tunnel
- Extraordinary interaction between interior and exterior spaces
- Light ice chain for an extraordinary experience in the north sea

VICKY

THE UTMOST DYNAMISM

She is an exceptionally dynamic yacht, allowing guests to choose where to spend their time among the many areas that Project Vicky offers: privacy is ensured but at the same time flexibility is a must.

The lower deck is designed with a walk-in tunnel that allows discreet passage from bow to stern. This feature is particularly useful for performing maintenance tasks while guests are onboard, without disturbing their experience.

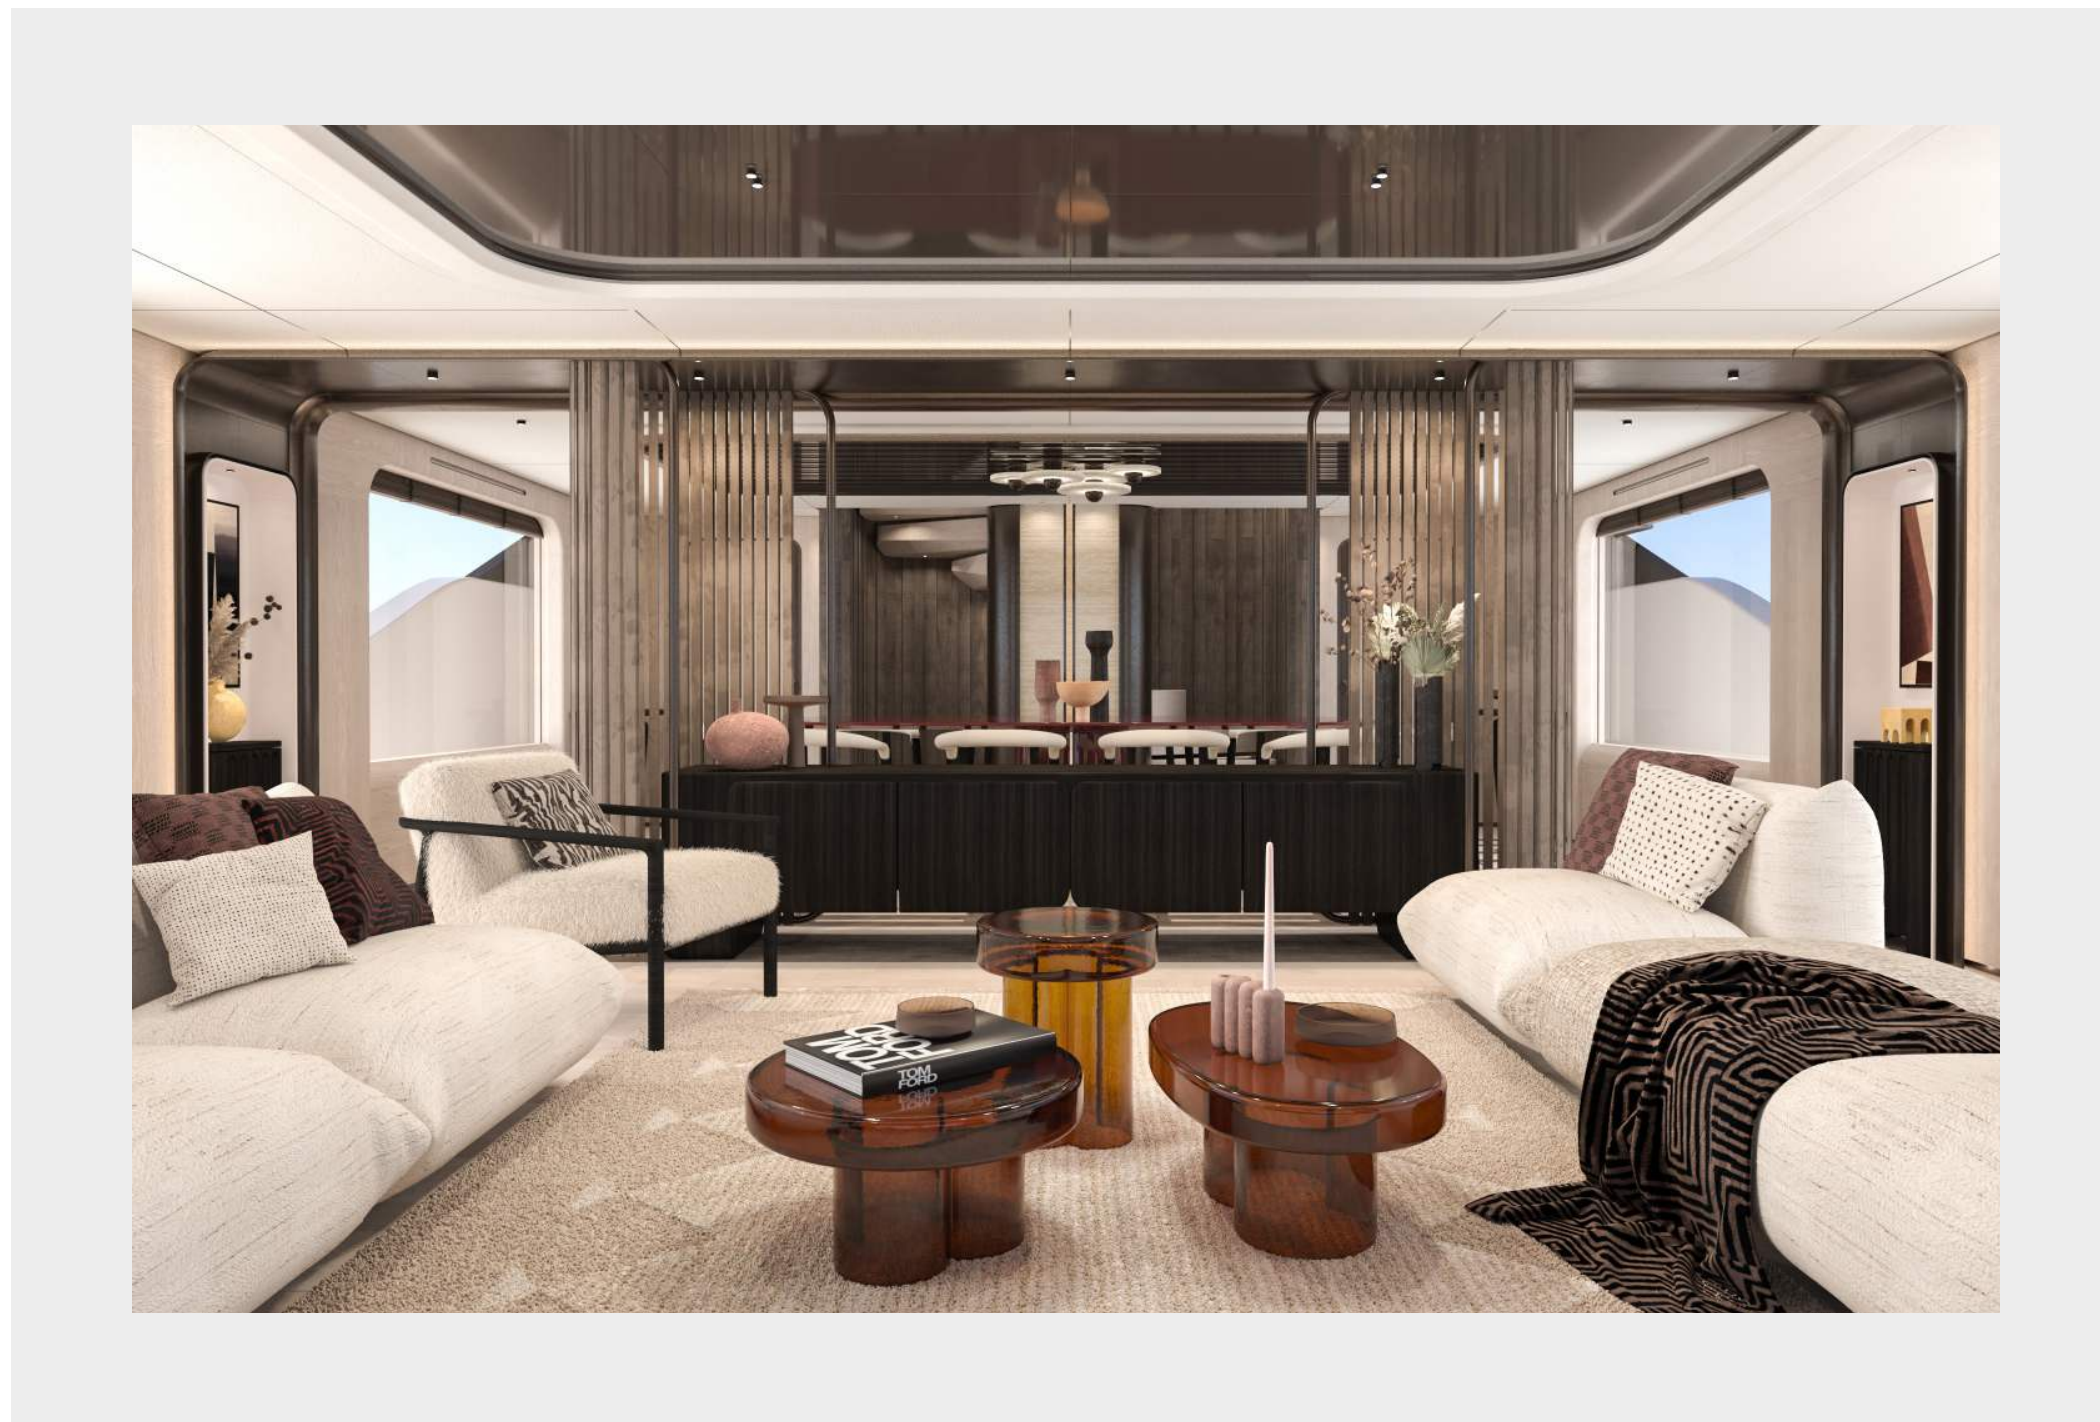

THE INTERIOR SPACES

The yacht's layout epitomizes contemporary interior design trends, with a meticulous focus on the selection of premium materials. During the design phase, the owner is granted complete freedom to customize the interior, ensuring that every detail aligns with their personal taste and aesthetic vision.

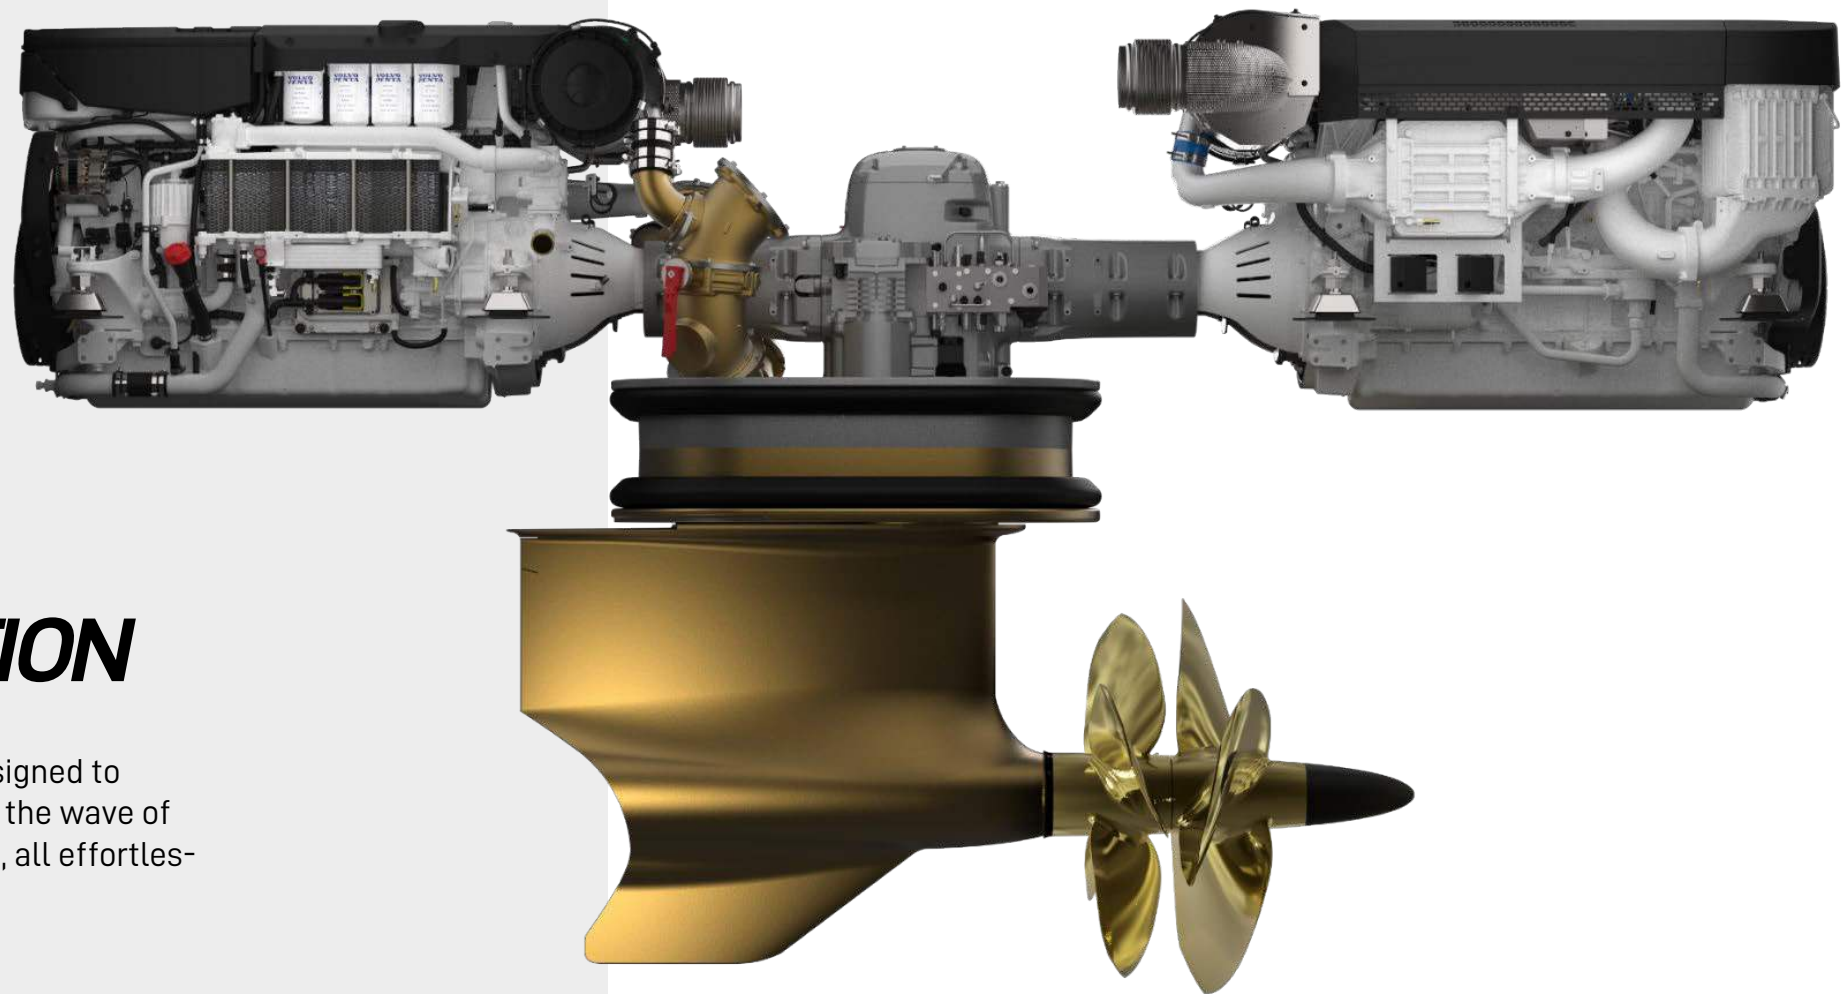

VOLVO PENTA PROPULSION OPTION

The Volvo Penta IPS professional platform is designed to revolutionize your experience on the water. Feel the wave of power and assurance of top-grade performance, all effortlessly integrated and at your command.

Comfort

Silence, low noise and vibrations
Compact engine room, more space for what matters

Cost of Ownership

Low fuel consumption
Longer time between service and overhaul

Performance

Market leading manouverability
Forward facing propulsion efficiency

Sustainability

Flexible with modular power input options, prepared for electrification
Low exhaust emissions, IMO III

Uptime

Advanced connectivity enabling remote diagnostics and predictive maintenance
Low fuel consumption
Longer time between service and overhaul

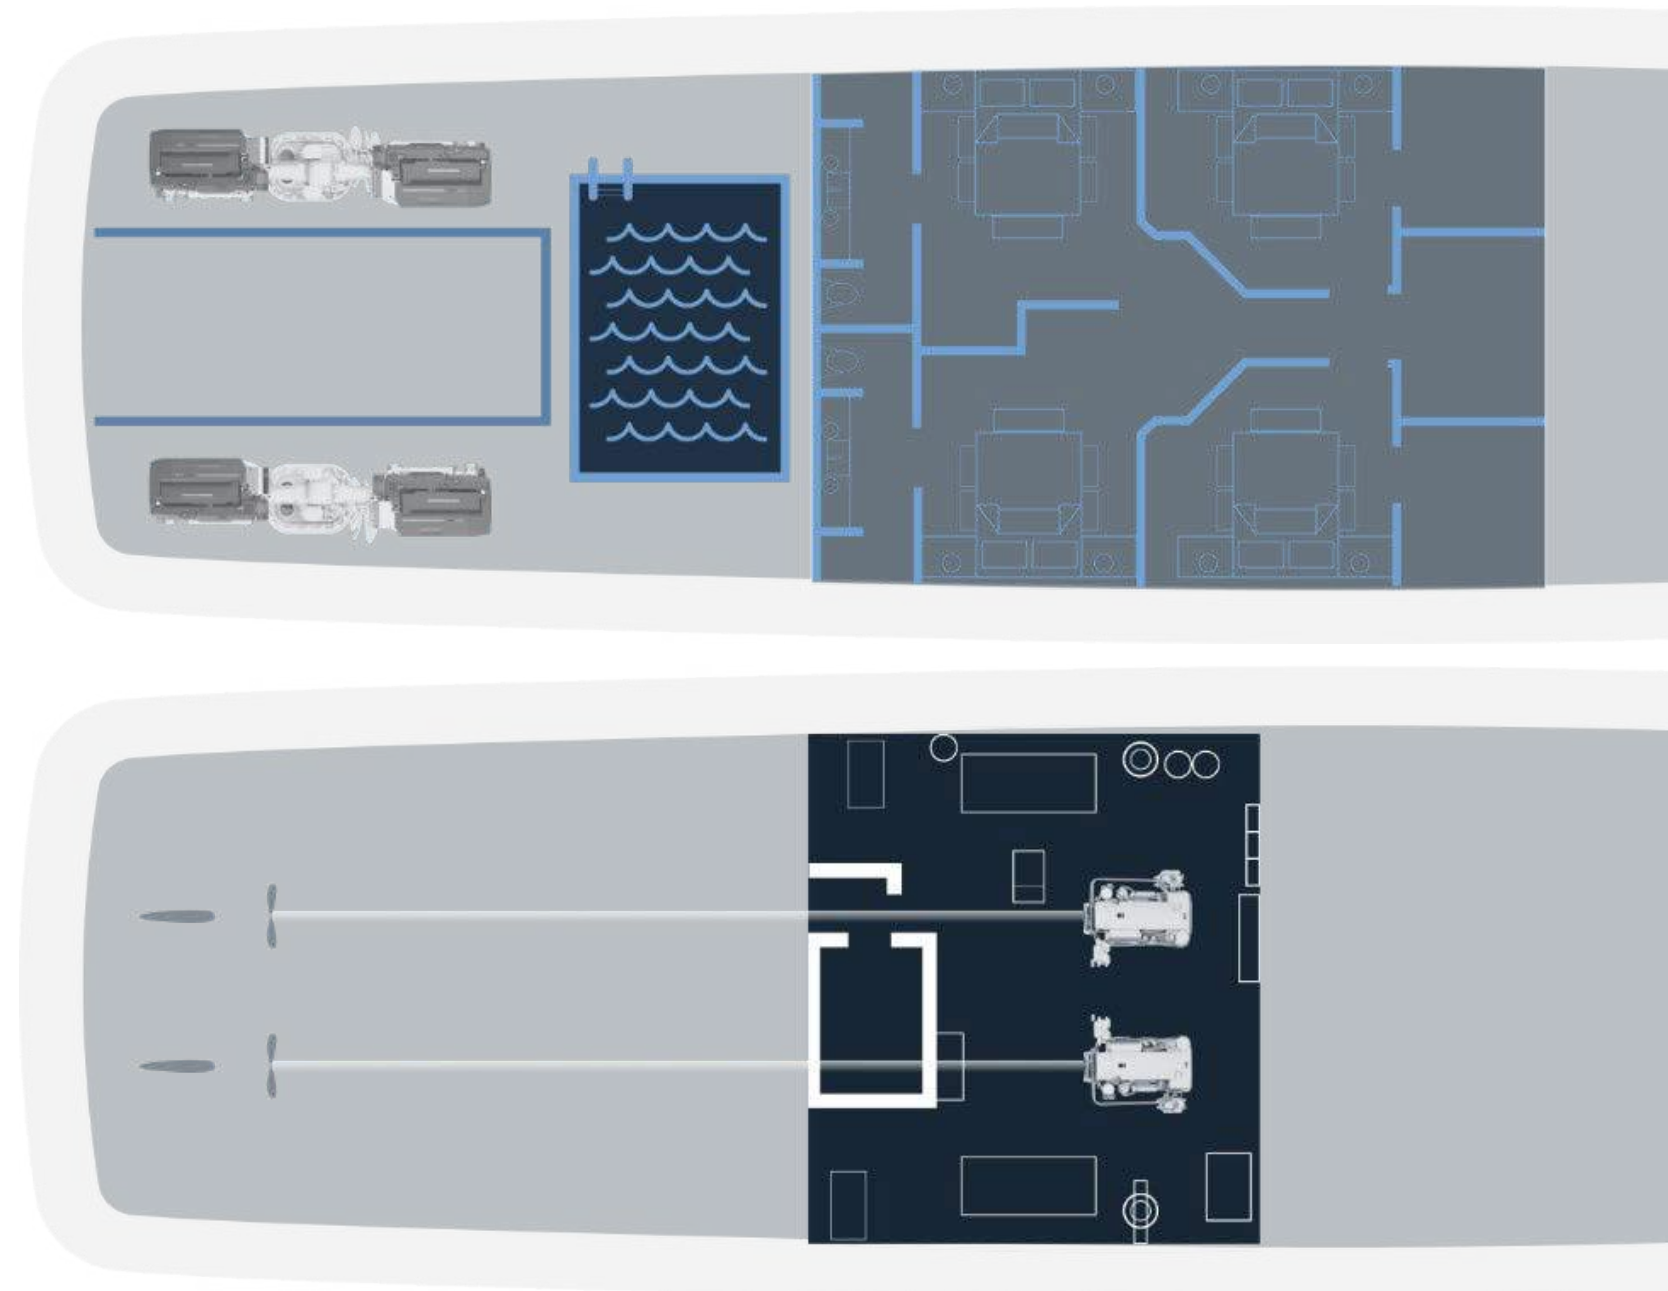

Service and Support

5 years warranty
Commissioning and Captain Training

MORE SPACE FOR WHAT MATTERS

The propulsion package is compact and positioned far aft. Compared to a conventional inboard shaft installation, this creates increased space on board for relaxation, productivity, crew and cargo. And thanks to the through-hull suspension design and integrated exhaust system, the platform delivers premium onboard comfort by ensuring low noise and vibration levels –up to 50% less than a traditional installation.
