Technical Services

Expert technical solutions for
all aspects of your yacht

Defining Excellence

Floating Life's expert yacht technical support
and solutions services

Pioneers of technical excellence

Be your benchmark for advanced technical expertise

Our team of qualified and experienced professionals is committed to delivering exceptionally reliable services to ensure yacht quality, safety, and security. We conduct a comprehensive technical assessment through detailed reports and images, identifying areas requiring attention. By integrating technical expertise with a profound understanding of client needs, we provide ethical and efficient support, fostering enduring client relationships.

The dynamic culture of Floating Life

At Floating Life, we cultivate a high-energy culture that permeates every facet of our operations. Our dedication to raising the bar in the yachting industry remains unwavering, and we look forward to the prospect of serving you with the utmost excellence.

Why choose our services?

Yacht New Build

Our in-house new construction team

We follow a project from the Yacht conception that would best represent and suit the Owner, through to construction at a worthy shipyard. We have strong and reliable relationships with leading naval architecture studios and designers, as well as with the most prominent shipyards to guarantee our Clients' attention to detail and the achievement of their exact requirements.

Pre-contractual consulting

Stage One

Our pre-contract advisory services ensure that you are fully prepared before entering into any agreements. We provide thorough analysis, strategic guidance, and expert advice to help you make well-informed decisions, mitigating risks and setting the foundation for a successful project.

Evaluating the Yacht Owner's Needs and Expectations

Understanding the owner's needs and preferences for yacht usage, style, size, and features ensures the final product matches their vision and lifestyle.

Proposals and Selection of Shipyards

Screen shipyards for their ability to meet the owner's requirements and high standards. Collect and assess proposals based on strengths, reputation, experience, cost, and timelines to choose the best fit.

Assembling the Team for the New Build Superyacht

Building a Superyacht requires a specialized team of professionals, including naval architects, designers, engineers, and project managers. Assembling the right team is essential for turning the owner's vision into reality.

Contract Negotiation and Signing

Negotiate and finalize contract terms, including costs, timelines, and specifications, to ensure all details are settled. Once the contract is signed, the project officially moves forward into the construction phase.

Developing the Design Concept

Create sketches, models and detailed plans reflecting the owner's vision. Refine the concept and ensure it meets aesthetic and functional criteria, with owner approvals.

New construction project management

Stage Two

Our comprehensive new construction project management services ensure that every aspect of your project is meticulously planned and executed. From initial concept and design to final delivery, we oversee the entire process, ensuring that timelines are met, budgets are adhered to, and quality standards are maintained.

Supervision of project Design and Engineering Development

Oversee the design and engineering phases to ensure that the yacht meets all project specifications maintaining the highest quality and most advanced technology.

Superyacht Construction Management

Supervise the construction process with periodic visits to the yacht and meetings with the team and shipyard to ensure adherence to timelines, quality standards, and budget.

Testing, Sea Trials, Commissioning and Delivery Acceptance

Perform testing and sea trials, ensuring the proper functioning of all systems. Supervise the commissioning process and perform final acceptance and handover to the owner through our specific 'FL Acceptance protocol'.

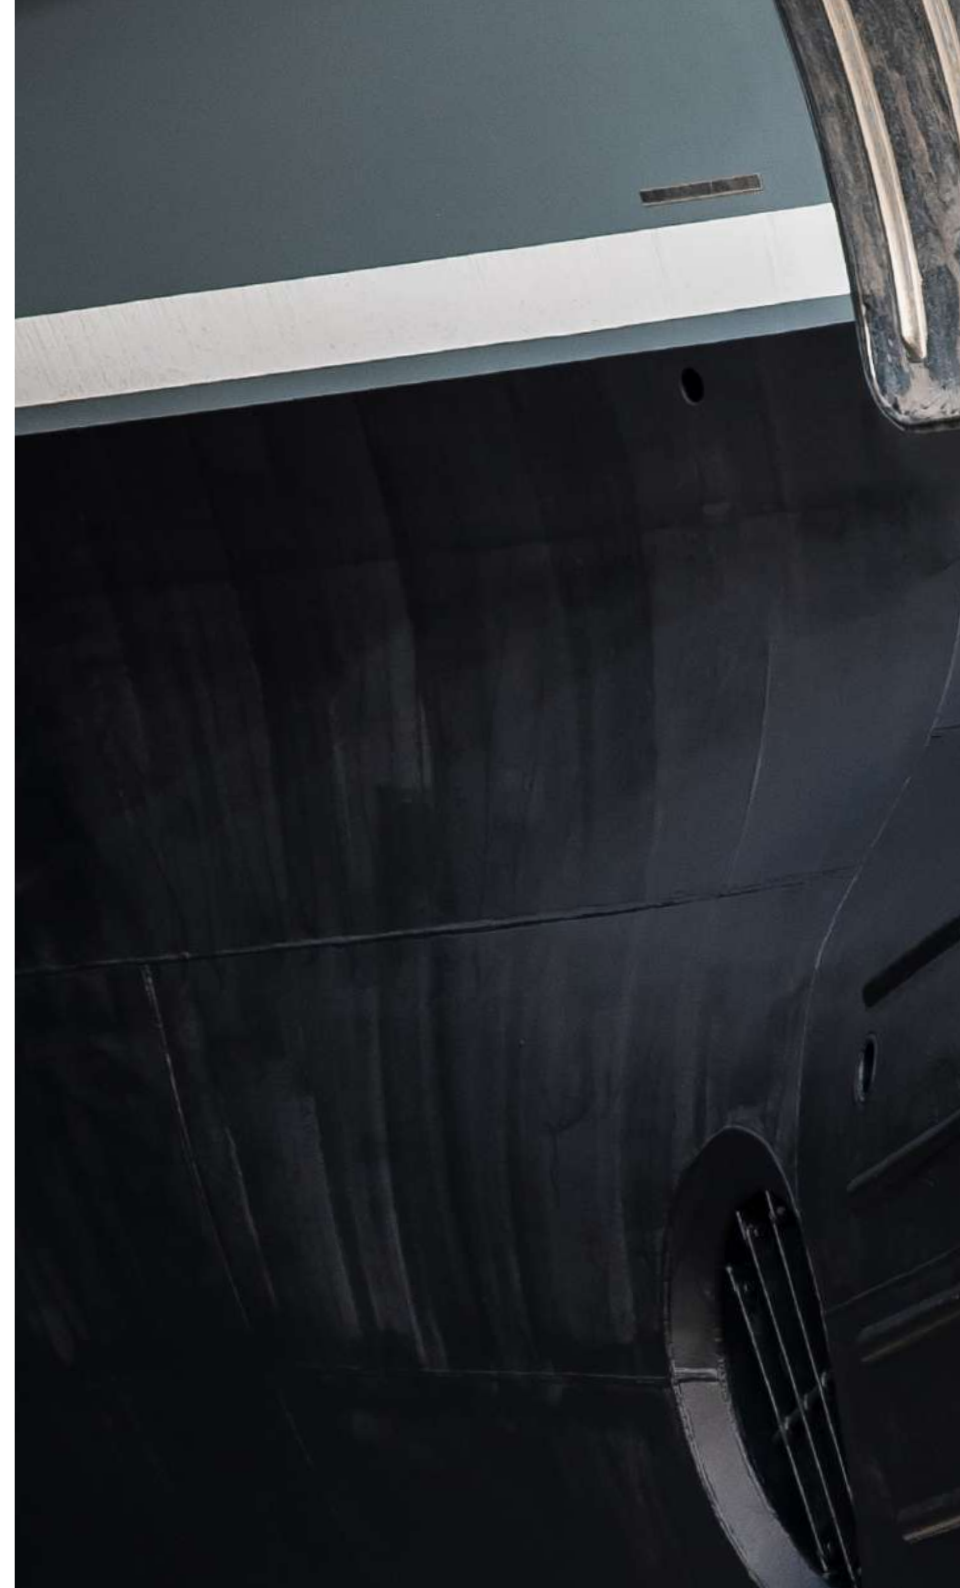

Warranty and Support

Handle all warranty claims by coordinating communication with the shipyard and organizing interventions through our technical support team.

Yacht Refit

Our team monitors the shipyard, provides updates and resolves issues quickly

FloatingLife ensures your superyacht refit is a success, delivered on time and within budget, from large-scale, complex projects to precise, targeted upgrades. We thoroughly analyze and compare costs, assemble specialized project teams, and oversee every stage of the process, ensuring your yacht refit proceeds smoothly and meets the highest standards, whether it's interior refurbishments, exterior repaints, hull extensions, or engineering improvements.

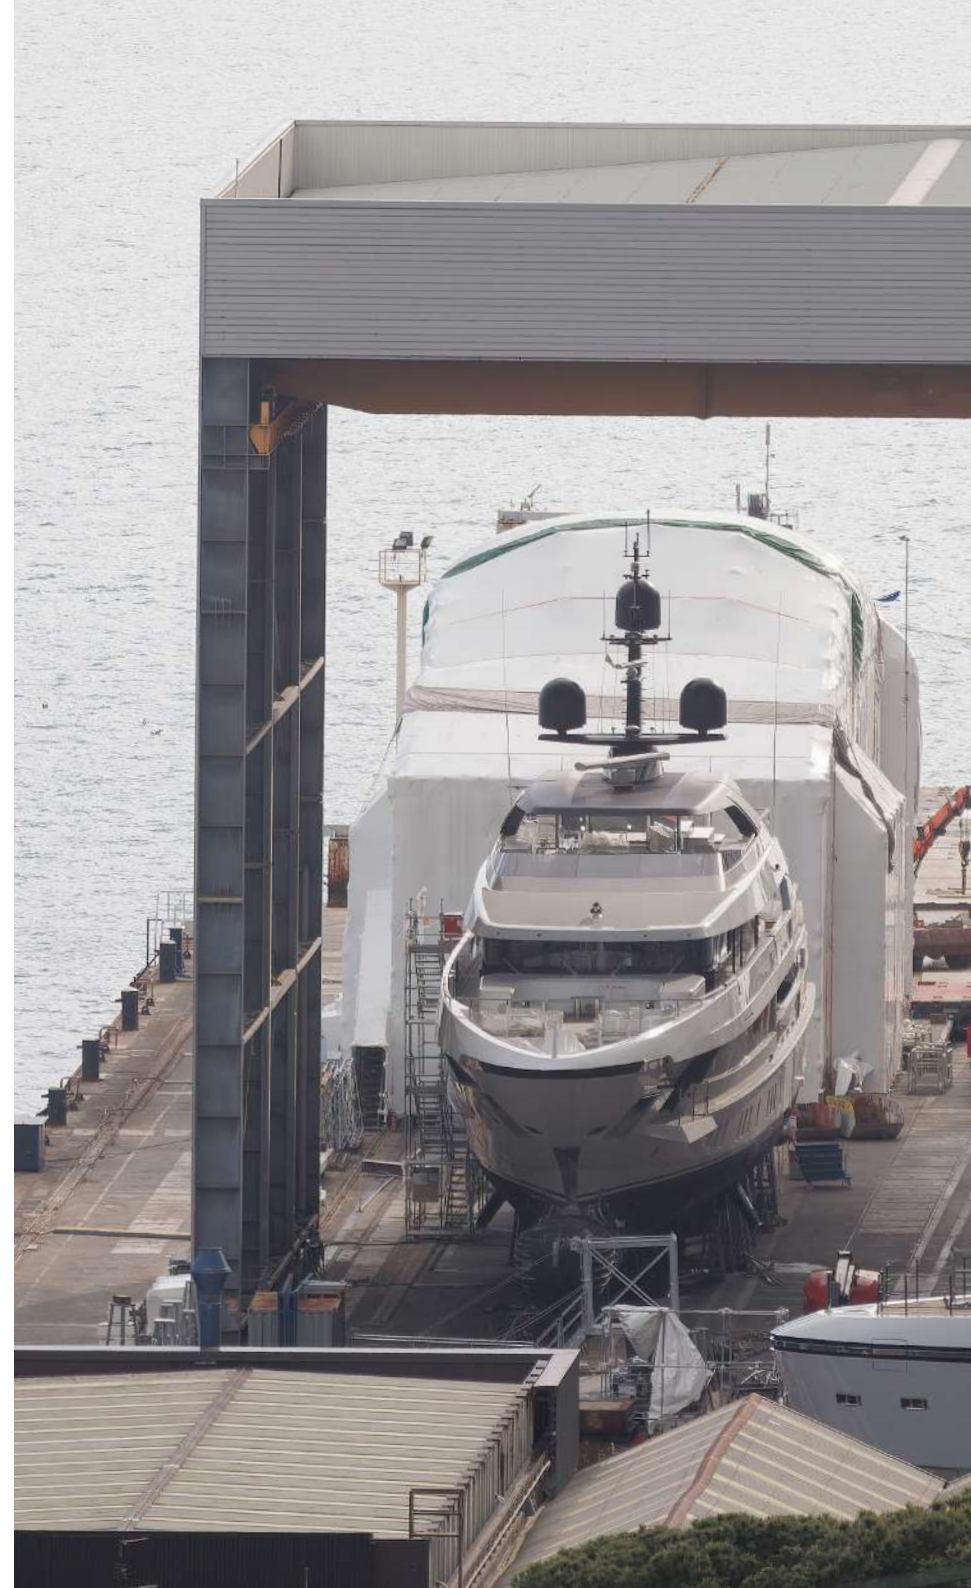

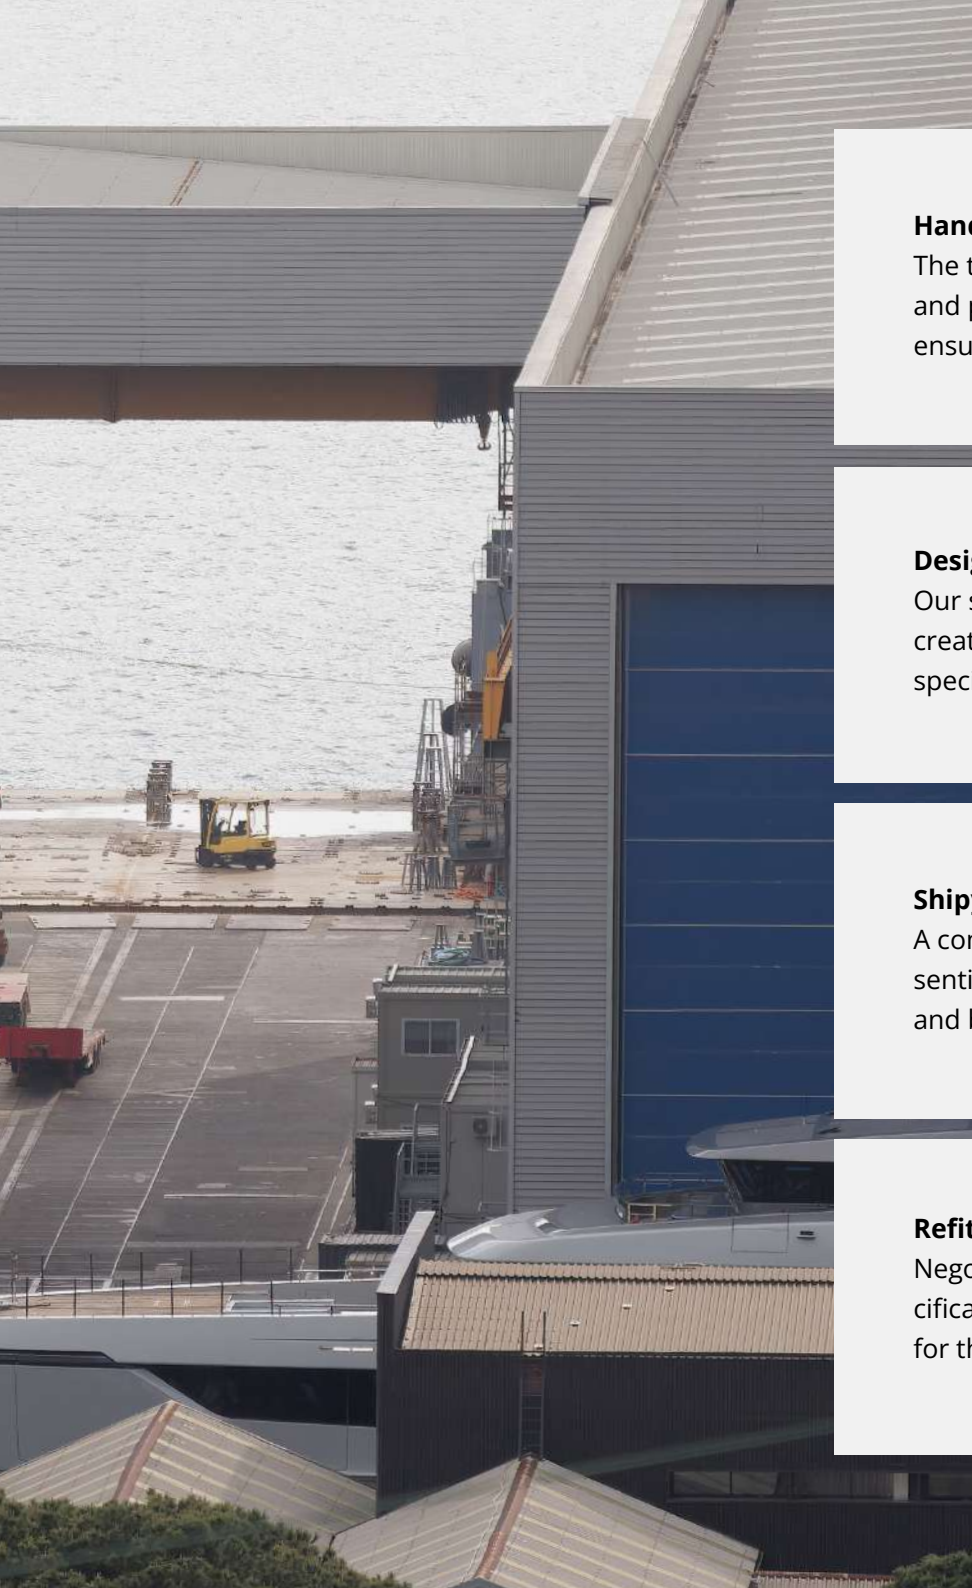

Consulting for the initial phase

Stage One

Our expert team provides strategic advice and support to ensure smooth and efficient operations. From assessing project feasibility and defining objectives to planning resources and managing risks, we work to establish a solid foundation for your refitting project. With our tailored approach, we assist you in navigating complex decisions and setting the stage for a successful refit.

Handling of Owners' request

The technical office meticulously reviews and analyzes all requests and preferences from the yacht owner to propose effective solutions, ensuring the refit aligns with the latest construction technologies.

Design Support

Our skilled designers and engineers collaborate with the owner to create practical, refined designs using materials that meet the yacht's specifications and expectations.

Shipyard selection

A comprehensive evaluation of potential shipyards is conducted, presenting the owner with the best options based on expertise, facilities, and budget for the refit.

Refit contract

Negotiate and finalize contract terms, including costs, timelines, specifications, and warranty clauses, to ensure full clarity and protection for the owner.

Refit project Management

Guardians of maritime safety

In the yacht refit process, we ensure a meticulous and professional approach, strictly adhering to current regulations and delivering a final result that meets the owner's expectations.

Compliance with flag and register regulations

All refit work is executed in strict adherence to flag state and classification society regulations, ensuring the yacht complies with all legal and safety standards. Our technical office oversees requests and coordinates meetings with surveyors.

Testing and delivery acceptance

Perform testing and sea trials ensuring the proper functioning of all systems. Supervise the commissioning process, carry out the final acceptance of the refit work, and complete the hand-over to the owner through our specific 'FL Acceptance Protocol'.

Refit construction management

Supervise the refit process through periodic visits to the yacht and meetings with the team and shipyard to ensure adherence to timelines, quality standards, and budget, providing regular reports to the Owner.

Refit warranty support

Handle all warranty claims by coordinating communication with the shipyard and organizing interventions through our technical support team.

Pre-Purchase & Services

Our expert guidance ensures a smooth, informed, and secure investment

Our pre-purchase advisory service is designed to ensure you make an informed and confident decision when acquiring a yacht. We conduct thorough evaluations, including detailed inspections and comprehensive assessments of the vessel's condition, performance, and value.

Pre-Purchase

Providing guidance throughout the entire purchasing process

Our team of experts provides insights into market trends, ownership costs, and potential resale value, guiding you through the entire purchasing process. With our support, you can navigate negotiations, contracts, and due diligence with ease, ensuring your investment is sound and aligns perfectly with your expectations and requirements.

Owner's Expectations and Survey Planning

Our technical team collaborates with the client to understand their needs, provide an inspection overview, and review contract clauses with the legal team to ensure client protection. We also plan visits with clear objectives and evaluation criteria.

Documentation and Certificates Audit

Our team conducts a meticulous reviews of all yacht documentation, including ownership certificates, navigation licenses, maintenance records, and refitting details, to ensure that are current and fully compliant with regulations and secure a legal purchase.

Visual Inspection and Preliminary Assessment

The Floating Life team conducts a detailed visual inspection of the yacht, covering the wheelhouse, cabins, engine room, and deck allows us to assess the overall condition of the yacht and identify any signs of wear or damage.

Dock trials

A full series of dock trials are performed to test all systems, including the engine room, interior, and exterior. We ensure proper functionality of all instruments, verify safety systems, and confirm the yacht's overall reliability.

Sea Trials

A complete sea trial, following the FL protocol, thoroughly evaluates the yacht's performance, focusing on maneuverability, stability, speed, and comfort. We evaluate its behavior under different loads and sea conditions to ensure a full assessment of its capabilities.

Dry Dock Inspection

A detailed hull inspection is performed with the yacht out of the water, using advanced tools to measure thickness and humidity. This process checks structural integrity and identifies any issues like corrosion or damage to ensure the yacht's condition and safety.

Paint inspection

The top-coat is inspected to assess the yacht's surface quality and finish, focusing on appearance and integrity to identify any critical areas and evaluate the overall condition of the exterior paintwork.

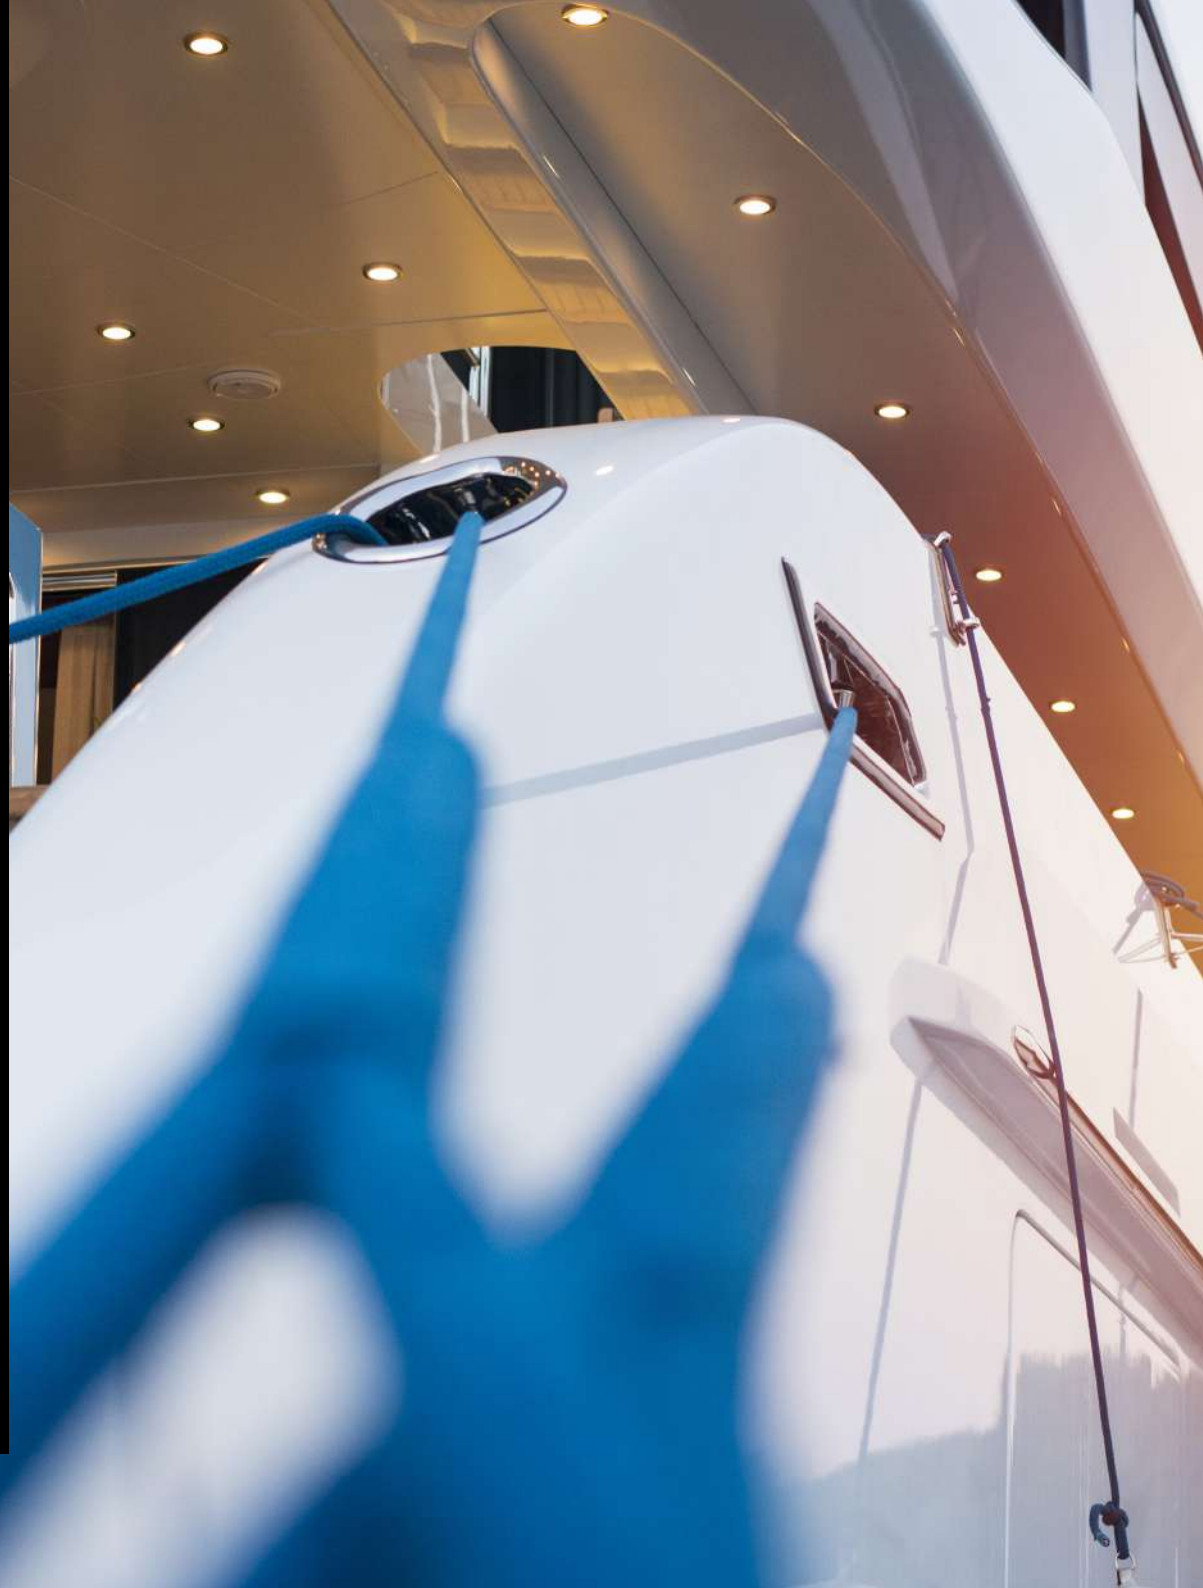

Final Report

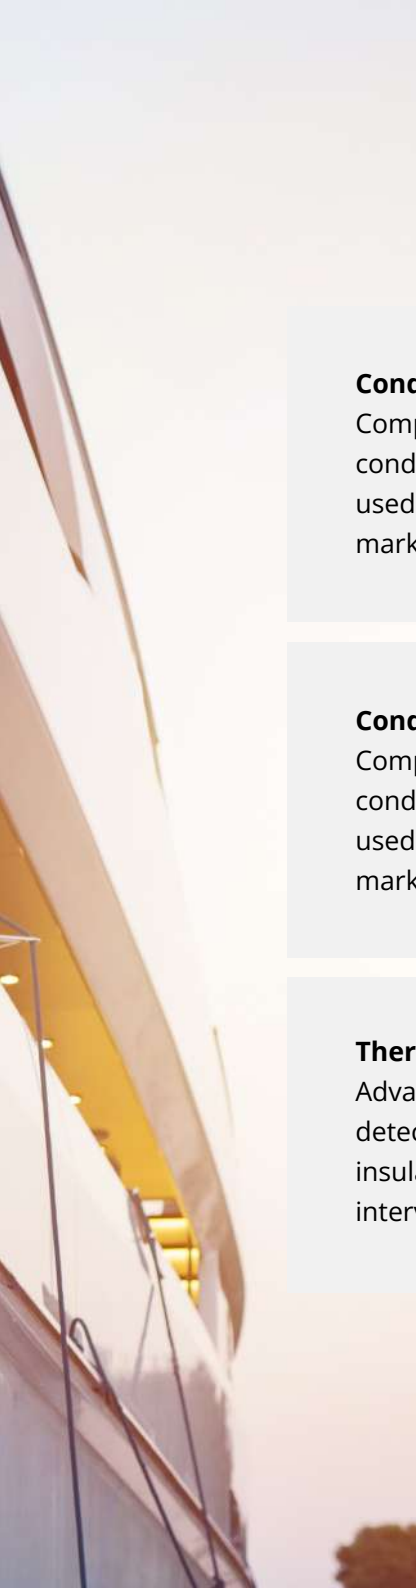

Our report summarizes test results, detailing the yacht, procedures, and identified defects with photos. It offers a clear overview of the yacht's condition to support informed decisions and negotiations.

Our Services

Our services offer insights,
guidance, and peace of mind

At Floating Life, we offer a wide range of specialized surveys and assessments to ensure your yacht is always in optimal condition. Our services are designed to provide comprehensive insights, guide maintenance decisions, and offer peace of mind for both owners and insurers.

Condition evaluation surveys

Comprehensive assessments of the yacht's overall condition, delivering detailed reports that can be used for insurance purposes or to establish a starting market price.

Paint survey

The yacht's paint is analyzed for condition, thickness, and adhesion to ensure lasting protection and aesthetics. Regular inspections ensure full or partial repaints meet top standards.

Condition evaluation surveys

Comprehensive assessments of the yacht's overall condition, delivering detailed reports that can be used for insurance purposes or to establish a starting market price.

NDT testing

Non-Destructive Testing (NDT) checks yacht materials for hidden defects without damage. Ultrasonic testing measures hull thickness, while dye penetrant tests detect cracks in critical surfaces.

Thermal image investigation

Advanced thermal imaging technology is used to detect hidden issues such as electrical faults, insulation problems, or water ingress, ensuring early intervention.

Why choose our services?

With you from concept to delivery

We partner with you throughout the entire journey, from the initial idea to the final delivery, ensuring a smooth and successful process.

Decision making without risk

Our expertise and thorough analysis provide you with clear, risk-free decision-making, giving you confidence at every step.

Impartial and independent support

Enjoy unbiased, independent advice tailored to your needs, with no conflicts of interest, ensuring your best interests are always our top priority.
